AUTHORIZED FOR	PFIZER-BIONTECH	MODERNA	J&J/JANSSEN
6 months-4 years	YES	YES	No
5-17 years old	YES	YES	No
18 years and older	YES	YES	YES

## Why Children and Teens Should Get Vaccinated for COVID-19

- While COVID-19 tends to be milder in children compared with adults, it can make children very sick and cause children to be hospitalized. **In some situations, the complications from infection can lead to death.**
- Vaccinating children **can help protect family members**, including siblings who are not eligible for vaccination and family members who may be at increased risk of getting very sick if they are infected.
- Vaccinating children **can help keep them in school** and help them safely participate in sports, playdates, and other group activities.

Help protect your whole family and slow the spread of COVID-19 in your community by getting yourself and your children ages 5 years and older vaccinated against COVID-19.
